Description

Final-year student at EPITA Paris, I am looking for a final-year internship in software development starting in February 2027.

Education

- **Software Engineering Degree**
Since Sept. 2024 **EPITA** Le Kremlin-Bicêtre
- **CPGE MP2I/MPI**
From Sept. 2022 to July 2024 **Lycée Camille Guérin** Poitiers
- **Baccalauréat**
From Sept. 2019 to July 2022 **Lycée Grandmont** Tours
Mathematics (experts), Physics-Chemistry, Biology

Professional Experience

- **JavaScript & GraphQL Screen Development**
From Oct. 2025 to Jan. 2026 **Dalim Software** Kehl, BW, Germany
Creation and improvement of JavaScript screens using GraphQL API and automation scripts in Python and Shell. Collaboration with my international colleagues in customer support and R&D.

Projects

VPS Deployment

Hosting and administration of services on a personal VPS in order to master the entire deployment chain (CI/CD).

Data Wall

Solution enabling touch interaction on a wall-projected screen to create health-themed quizzes and a serious game. We are carrying out this project as a team of 4 over 8 months, starting from the design phase with the writing of specifications up to final deployment, including sensor processing and the technical implementation of the web platform and Unity modules.

Compass

Community web application designed to connect companies and schools via an interactive graph. We are building this project over a year in a team of 4 people, using Quarkus and Angular with PostgreSQL and Neo4j.
